

WHY SCHEDULE A DISCOVERY VISIT?

RJO Networks' engineers will complete an exhaustive survey of your IT systems during our Onsite Discovery Visit. The ensuing **Network Assessment & Recommendations Report** provides you with the facts you need to make important decisions.

- Learn the current state of your computer network
- Determine if your systems are ready for Windows 7
- Discover deficiencies in your disaster preparedness
- Ascertain the costs for enhancing your IT systems

The RJO Networks Discovery Visit is the easiest, quickest and most cost effective way to get your IT questions answered.

**NO RISK
NO OBLIGATION
NO COST**

"We all recognize the strategic importance of maintaining our company's technology infrastructure but may feel overwhelmed by the tasks involved. RJO Networks is perfectly positioned to help those firms which do not maintain an internal IT support staff and depend on an outsourced service provider to deliver solutions for these on-going complex IT tasks. Partnering with RJO Networks is a critical strategic business decision which leverages our expertise and efficiency to help you focus on your prime objective; increase your firm's productivity and profitability."

— Richard Ozsvath, President
RJO Networks

MANAGED SERVICES PRODUCT LINE

Our Managed Service offerings provide technology that you can trust to do the job. Services such as LAN maintenance, sophisticated network security and worry-free data backup allow you to focus on running your business instead of your network.

LAN Maintenance

Our regularly scheduled systematic care and servicing detects and corrects incipient system failures before they occur or develop into major disruptive defects.

Unified Communications

An easy-to-use hosted business solution that delivers a single unified communications experience that unites Voice over Internet (VoIP), email, instant messaging, voice mail, desktop sharing, web conferencing, ACD and PBX telephony systems.

Disaster Recovery Readiness

Minimize your firm's risk exposure by preparing your critical IT Systems for a speedy ramp up to a business-ready condition after a natural or human-induced incident.

Internet Solutions

From domain hosting, Website Design and Development, Internet marketing, Search Engine Optimization and ongoing website maintenance, we have you covered.

Network & Data Security

Protecting your network from internal and external threats requires constant vigilance. Our engineers employ the latest tools and ongoing monitoring to ensure your network and valuable data are always defended.

IT Project Management

Our methodical approach to IT Project Management has a track record of success. Project processes are guided through five distinct stages.

Customer Service Portal

Enhance the level of your customer's satisfaction by deploying an online portal for them to log on and view their account information, submit a request, participate in a survey, etc.

Our clients have placed their trust in us. Here is what they are saying:

"I highly recommend RJO Networks to those seeking assistance in this ever changing technological environment. From minor to major issues I can always count on continuous support. Should a new issue or problem arise I am confident that RJO Networks will come to the rescue and save the day."

— Cindy Groover, Controller
Waltkoch Limited

"Being a small business, we don't always have the IT skills and experience that are needed to keep our computer network up and running successfully. One of the best decisions we have made was hiring RJO Networks to manage our computer networking needs."

— Steve Weber, Managing Director
Turtle Creek Capital Partners
